Sensitization: Not classified as a sensitizer.

Specific Target Organ Toxicity:

Single Exposure: The principal effect exerted by 2-butoxyethanol and its metabolite 2-butoxyacetic acid is hematotoxicity, with the rat being the most sensitive species. In rats, adverse effects on the central nervous system, kidneys and liver occur at higher exposure concentrations than do the hemolytic effects.

Repeat Exposure: Prolonged intentional inhalation may result in respiratory tract irritation.

Carcinogen Status: None of the component of this product are classified as carcinogens by IARC, OSHA, NTP, ACGIH, or the EU Directives.

Germ Cell Mutagenicity: This product is not classifies as a mutagen. 2-Butoxyethanol was negative in the AMES test, both with and without activation, the Chinese hamster ovary assay and in a in-vivo bone marrow micronucleus test.

Toxicity for Reproduction: This product is not classifies as a reproductive hazard. 2-Butoxyethanol; In animals, adverse effects on reproduction and development have not been observed at less than toxic doses.

12.2 Persistence and Degradability:

No data available for product.

2-Butoxyethanol: The maximum Theoretical BOD reported was 88% for 20 days

Dipropylene Glycol Methyl Ether: Five-, ten-, and twenty-day BOD values for were reported as 0, 0, and 31%, respectively. This delayed oxygen demand suggests that an acclimation period is required in order for a dipropylene glycol monomethyl ether-degrading population to become established.

12.3 Bioaccumulative Potential:

No data available for product.

2-Butoxyethanol: The potential for bioconcentration in aquatic organisms is low.

Dipropylene Glycol Methyl Ether: Infinitely soluble in water, it will not be expected to bioconcentrate in aquatic organisms.

12.4 Mobility in Soil:

No data available for product.

2-Butoxyethanol: Is expected to have high mobility in soil.

Dipropylene Glycol Methyl Ether: The high water solubility of dipropylene glycol monomethyl ether suggests that it will not sorb to soils or sediments and, therefore, would be expected to leach through soil.

12.5 Results of PBT and vPvB Assessment:

Not required.

12.6 Other Adverse Effects:

None.
